Calidades y Diferenciación

Calidad y durabilidad

Utilizamos melaminas de 19mm y 40mm de grosor que garantizan la resistencia para perdurar en el tiempo.

Tirador-uñero

Este perfil proporciona una fácil apertura de puertas y cajones con una apariencia limpia y moderna.

Molduras de madera

Las molduras nos ofrecen la posibilidad de emplear el mismo acabado del mueble en las puertas de cristal

Perfil aluminio más ancho

Para añadir un toque de elegancia y personalización, utilizamos perfiles de metal en nuestras puertas de cristal.

Limpieza

Utilizamos un material antibacteriano de fácil limpieza, proporcionando un entorno higiénico y de mantenimiento sencillo.

Herrajes de alta gama

Herrajes más seguros y resistentes que generan confianza, añadiendo un elemento distintivo y refinado.

Huecos

Su incorporación rompe la línea estética del mueble aportándole armonía. Es un elemento tan funcional como innovador.

Capacidad

Esta colección está basada en ofrecer soluciones de almacenaje versátiles y contemporáneas.

Los **tableros de melamina** que utilizamos para fabricar nuestros muebles son **fáciles de limpiar, impermeables a los líquidos, resistentes a los arañazos y disponen de propiedad antibacterial.**

Base

Zócalo

El zócalo mide 7,5cm; es la base más clásica. Es ideal si no quieres que entre nada por debajo del mueble.

Fondos y alturas

La **vitrina** es un mueble **útil y decorativo**: te ayuda a organizar el menaje, la puedes utilizar como mueble bar y para guardar otros objetos del salón-comedor.

El **fondo** de nuestras vitrinas es de **42,5cm**, ni muy ancho ni muy estrecho, ideal para que puedas ponerla contra la pared y sobresalga lo justo y necesario.
